

Custom Solutions to Support Populations with Complex Needs

**Custom Solutions.
Targeted Outcomes.
Proven Experience.**

There is no one-size-fits-all approach to delivering human services.

That's why Benchmark Human Services offers an array of customizable options to support people with needs related to mental health, intellectual and developmental disabilities, autism, or significant medical conditions.

Over the last 15 years, Benchmark has become a go-to partner for state and county governments, insurance companies and MCOs, and service providers throughout the country. Powered by 60+ years of experience as a service provider, we work side by side with our partners to offer customized solutions that support individuals with complex needs.

OUR ROSTER OF SOLUTIONS INCLUDES:

Active ConsultingSM

STATES INCLUDE: AR, AL

Licensed clinicians deliver intensive, walk-alongside consultation and clinical support for providers and family caregivers supporting individuals at risk of or in crisis.

Benchmark provides in-person and virtual staff training, customized to the provider organization. We also identify behavioral support staff who can be developed into higher-level roles to increase the provider's internal capacity.

Community Transition

STATES INCLUDE: DE, GA, IN, MD, MO, MT, NH, OH

Experienced staff provide intensive transition planning, clinical, habilitation, residential, and other services to assist children and adults in moving to less restrictive settings.

Benchmark has successfully supported states' deinstitutionalization and downsizing efforts. We secure and modify homes for individuals with significant needs and provide services, so they can transition out of centers and move into the community.

Family Unification

STATES INCLUDE: GA, IN

Our staff collaborate with the child welfare agency, the referred family, and any collateral supports to assess strengths and needs, develop strategies, and implement counseling, case management, and other services with the goal of keeping the child and family healthy, safe, and together.

Benchmark provides trauma-informed mental health and substance use prevention/treatment services and in-home programs to referred families.

Mobile Crisis Response

STATES INCLUDE: GA, ID, IN, OK

Two-person teams of clinical staff and peer support specialists provide 24/7/365 in-person and remote crisis response to anyone in need.

Our teams de-escalate crises, support individuals in crisis, and connect individuals with community resources. Benchmark aims to decrease unnecessary use of emergency department and law enforcement resources while providing safety and support for individuals in need.

Short-Term Crisis Residential

STATES INCLUDE: GA

We operate short-term respite homes for individuals who are experiencing acute crises and need intensive support to stabilize. Our goal is to help individuals transition into less intensive placement and return to their lives in the community.

From the point of admission, we begin discharge planning. We complete post-transition follow ups to support individuals' success and stability.

Specialized Residential

STATES INCLUDE: DE, GA, IN, MD, MO, MT, NH, NJ, OH

Highly-trained staff provide a broad spectrum of customized residential care, ranging from 24/7/365 to several hours a week, to individuals with a wide range of abilities, including those with extensive medical and behavioral needs, forensic backgrounds, and history of institutionalization, aversive interventions and life experiences.

Benchmark Human Services operates in 19 states, and our full roster of services includes: Active Consulting, autism services and ABA therapy, day services, early intervention, employment services, family unification, group homes and supported living, mobile crisis response, and pediatric home health.
